Learning New Skills

In a recent World Economic Forum drone technology featured prominently as part of the “Fourth Industrial Revolution.” India in particular was highlighted during the forum as a good example of how drone technology holds tremendous potential to solve challenges in healthcare, food security, climate, agriculture, work safety, biodiversity and more. India is using drones in agriculture through land mapping, precision farming, agrochemical spraying and crop assessment. This is a new frontier for India and represents a paradigm shift in agricultural management. Drones are transforming access to healthcare across India.

The initiative is delivering medicines, diagnostic samples and vaccines to remote areas using drones.

Shiva recently had the opportunity to participate in a drone workshop at his college. Kasturi Drones Institute came to his campus and taught the students how to build a drone. It was an extraordinary experience that will enhance his skill set for future employment. Shiva said, “I enjoyed building a drone from scratch, it was so much fun!”

Shiva at a Drone Workshop organized by his college Little Flower Degree College and Kasturi Drones Institute. (Second from right.)

Samuel and Anitha are Engaged

Samuel and Anitha have been waiting for this moment for years. We are so happy for these two and so proud of them and all they have accomplished to get to this momentous occasion in their lives. They both spent years on their education, Samuel now has a doctorate in Pharmacology and landed his dream job this past year working for a large pharmaceutical company in the research department. He has already been promoted, which is no surprise to his family. Samuel has always been a driven, dedicated young man with big dreams and an even bigger heart.

Anitha is an optometrist. To make her dream come true she had to travel to another state for her education. She lived in Chennai for

three years, coming home for holiday's and summer break. They both graduated last year and found jobs immediately in their persepective fields. They have been saving money for the wedding. They will marry in November and start their new life as a married couple. We look forward to celebrating with them, surrounded by family.

We are deep into the 2025/2026 college season and everyone is working hard toward their goals. With a wedding to celebrate in November and year-end giving season just around the corner we look forward to sharing life with you - our family of supporters. Thank you for being a part of our on-going journey.

**IMPACT A CHILD - IMPACT THE WORLD
WE ARE ON A MISSION TO CHANGE LIVES**

100% of your donation goes to supporting our kids.

Consider a Monthly Sponsorship

Sustainable giving in the form of a monthly sponsorship provides stability. For just \$49 a month, you can sponsor one of our kids and help us meet the needs required to maintain a quality education. This monthly support helps pay for a monthly metro pass, school supplies, tuition and more. Bhaskar is studying to be an Ophthalmologist at Ellite College of Paramedical Studies.
